

Metrotech Introduces HL 10™ Hand Held Acoustic Water Leak Location Device

Santa Clara, CA—October 9, 2008— Metrotech Corporation, a leading provider of high-quality water leak location products and utility locating instruments, today introduces the HL 10™ Acoustic Water Leak Location Device. An easy to use, compact, hand held equipment with acoustic and visible values for leak survey and leak pinpointing while reducing leak location time.

The HL 10 has three filter settings for best frequency selection at a particular leak situation. The easily selected volume and sensitivity control enables a technician to identify leaks immediately by reducing environmental background noise. The visual LED indicator assists the leak location procedure and the one-handed, ambidextrous unit allows for efficient and effortless completion of multiple tasks. Leak results are stored with a touch of the mute switch. A built-in LED light improves visibility in dark areas. The HL 10 includes a noise cancellation lightweight headphone with volume control, an IP 67 piezo contact microphone with magnet and tripod for pinpointing on roads and concrete - extension rods and tip make it perfect for leak surveys on hydrants, valves, and meters. Greater versatility is gained by combining the HL 10 with the super sensitive wind protected GM 80 ground microphone. In addition, Metrotech delivers a professional hard case for storage with the HL10.

Availability

The HL 10 is ideal for water leak detection companies, municipal and rural water utilities, water leak contractors, and homeowners looking for water leaks. For more information on the new HL 10 Water Leak Locator, please visit our product page on our website at www.metrotech.com. The HL 10 is now available for purchase. Please contact our sales team at 800-446-3392 or email us at sales@metrotech.com for any questions.

About Metrotech Corporation

Metrotech Corporation is a leading provider of high-quality utility locating instrument solutions for all underground utilities. These quality instruments help improve efficiency, and increase productivity with the user-friendly controls. The result is less time locating and more money saved. Metrotech's pipe and cable locators are used by every utility, such as: gas and petroleum pipeline companies, military facilities, industrial maintenance departments, railroad companies, electric power, and telecommunication firms. Additionally, Metrotech offers water leak detection solutions for surveying and locating pressurized water leaks in freshwater systems for the municipal water utilities, plumbing contractors, golf courses and specialized leak detection instruments for sanitary districts.
